1 IIR1 -- Realtime C++ filter library

An infinite impulse response (IIR) filter library for Linux, Mac OSX and Windows which implements Bessel, Butterworth, RBJ and Chebychev filters.

The filter processes the data sample by sample for realtime processing.

It uses templates to allocate the required memory so that it can run without any malloc / new commands for example on embedded systems.

How to use the filter

First the filter is instantiated, then the parameters are set with the function `setup` and then it's ready to be used for sample by sample realtime filtering.

Setting the filter parameters

All filters are available as lowpass, highpass, bandpass and bandstop/notch filters. Butterworth / Chebyshev offer also low/high/band-shelves with specified passband gain and 0dB gain in the stopband.

See the header files in `\iir` or the documentation for the arguments of the `setup` commands.

The examples below are for lowpass filters:

1. Butterworth

```
const int order = 4; // 4th order (=2 biquads)
Iir::Butterworth::LowPass<order> f;
const float samplingrate = 1000; // Hz
const float cutoff_frequency = 5; // Hz
f.setup (samplingrate, cutoff_frequency);
```

2. Chebyshev Type I

```
Iir::ChebyshevI::LowPass<order> f;
const float passband_ripple_in_db = 5;
f.setup (samplingrate,
        cutoff_frequency,
        passband_ripple_in_db);
```

3. Chebyshev Type II

```
Iir::ChebyshevII::LowPass<order> f;
double stopband_ripple_in_db = 20;
f.setup (samplingrate,
        cutoff_frequency,
        stopband_ripple_in_db);
```

4. RBJ (2nd order with cutoff and Q factor)

```
Iir::RBJ::LowPass f;
const float cutoff_frequency = 100;
const float Q_factor = 5;
f.setup (samplingrate, cutoff_frequency, Q_factor);
```

5. Elliptic

```
Iir::Elliptic::LowPass<order> f;
const float pass_ripple_db = 5; // dB
const float rolloff = 0.1;
f.setup (samplingrate,
        cutoff_frequency,
        passband_ripple_db,
        rolloff);
```

Realtime filtering sample by sample

Samples are processed one by one. In the example below a sample `x` is processed with the `filter` command and then saved in `y`. The type of `x` can either be float or double:

```
float y = f.filter(x);
```

This is then repeated for every incoming sample in a loop or event handler.

Packages for Ubuntu (xenial / bionic):

If you have Ubuntu xenial or bionic then install it as a pre-compiled package:

```
sudo add-apt-repository ppa:berndporr/usbdx
```

It's available for 32,64 bit PC and 32,64 bit ARM (Raspberry PI etc)

Compilation from source

The build tool is `cmake` which generates the make- or project files for the different platforms. `cmake` is available for Linux, Windows and Mac. It also compiles directly on a Raspberry PI.

Linux / Mac

Run

```
cmake .
```

which generates the Makefile. Then run:

```
make  
sudo make install
```

which installs it under `/usr/local/lib` and `/usr/local/include`.

Both gcc and clang have been tested.

Windows

```
cmake -G "Visual Studio 15 2017 Win64" .
```

See `cmake` for the different build-options. Above is for a 64 bit build. Then start Visual C++ and open the solution. This will create the DLL and the LIB files. Under Windows it's highly recommended to use the static library and link it into the application program.

Unit tests

Run unit tests by typing `make test` or just `ctest`. These test if after a delta pulse all filters relax to zero and that their outputs never become NaN.

Documentation

Overview

For an overview of the class structure and general concepts have a look at `Documentation.txt`.

Learn from the demos

The easiest way to learn is from the examples which are in the `demo` directory. A delta pulse as a test signal is sent into the different filters and saved in a file. With the Python script `plot_impulse_fresponse.py` you can then plot the frequency responses.

Also the directory containing the unit tests provides examples for every filter type.

Detailed documentation

A PDF of all classes, methods and in particular `setup` functions is in the `doc/pdf` directory.

Run `doxygen` to generate the HTML documentation.

Credits

This library has been adapted from Vinnie Falco's original work which can be found here:

<https://github.com/vinniefalco/DSPFilters>

While his original library processes audio arrays this library has been adapted to do realtime processing sample by sample. Also, in contrast to the original library the `setup` command won't require the filter order. The filter design routines are identical to DSPFilters.

Enjoy!

Bernd Porr – <http://www.berndporr.me.uk>

2 Namespace Index

2.1 Namespace List

Here is a list of all documented namespaces with brief descriptions:

lir	14
lir::Bessel	16
lir::Butterworth	17

lir::ChebyshevI	17
lir::ChebyshevII	18
lir::Elliptic	18

5.1.2 Enumeration Type Documentation

5.1.2.1 Kind

enum [Iir::Kind](#)

Identifies the general class of filter

5.1.3 Function Documentation

5.1.3.1 `add()` [1/2]

```
template<class Td , class Ts >
void Iir::add (
    int samples,
    Td * dest,
    Ts const * src,
    int destSkip = 0,
    int srcSkip = 0 )
```

Utilities

These routines are handy for manipulating buffers of samples. Add src samples to dest, without clip or overflow checking.

5.1.3.2 `add()` [2/2]

```
template<typename Td , typename Ts >
void Iir::add (
    int channels,
    int samples,
    Td *const * dest,
    Ts const *const * src )
```

Multichannel add

5.1.3.3 `copy()`

```
template<typename Td , typename Ts >
void Iir::copy (
    int samples,
    Td * dest,
    Ts const * src,
    int destSkip = 0,
    int srcSkip = 0 )
```

Copy samples from src to dest, which may not overlap. Performs an implicit type conversion if Ts and Td are different (for example, float to double).

5.2 `Iir::Bessel` Namespace Reference

Classes

- class [AnalogLowPass](#)
- class [AnalogLowShelf](#)
- struct [BandPass](#)

- struct [HighShelf](#)
- struct [HighShelfBase](#)
- struct [LowPass](#)
- struct [LowPassBase](#)
- struct [LowShelf](#)
- struct [LowShelfBase](#)

5.3.1 Detailed Description

Filters with [Butterworth](#) response characteristics

5.4 `lir::ChebyshevI` Namespace Reference

Classes

- class [AnalogLowPass](#)
- class [AnalogLowShelf](#)
- struct [BandPass](#)
- struct [BandPassBase](#)
- struct [BandShelf](#)
- struct [BandShelfBase](#)
- struct [BandStop](#)
- struct [BandStopBase](#)
- struct [HighPass](#)
- struct [HighPassBase](#)
- struct [HighShelf](#)
- struct [HighShelfBase](#)
- struct [LowPass](#)
- struct [LowPassBase](#)
- struct [LowShelf](#)
- struct [LowShelfBase](#)

5.4.1 Detailed Description

Filters with Chebyshev response characteristics. The last parameter defines the passband ripple in decibel.

5.5 `lir::ChebyshevII` Namespace Reference

Classes

- class [AnalogLowPass](#)
- class [AnalogLowShelf](#)
- struct [BandPass](#)
- struct [BandPassBase](#)
- struct [BandShelf](#)
- struct [BandShelfBase](#)
- struct [BandStop](#)
- struct [BandStopBase](#)
- struct [HighPass](#)
- struct [HighPassBase](#)
- struct [HighShelf](#)
- struct [HighShelfBase](#)
- struct [LowPass](#)
- struct [LowPassBase](#)
- struct [LowShelf](#)
- struct [LowShelfBase](#)

5.5.1 Detailed Description

Filters with [ChebyshevII](#) response characteristics. The last parameter defines the minimal stopband rejection requested. Generally there will be frequencies where the rejection is much better but this parameter guarantees that the rejection is at least as specified.

5.6 `lir::Elliptic` Namespace Reference

Classes

- class [AnalogLowPass](#)
- struct [BandPass](#)
- struct [BandPassBase](#)
- struct [BandStop](#)
- struct [BandStopBase](#)
- struct [HighPass](#)
- struct [HighPassBase](#)
- struct [LowPass](#)
- struct [LowPassBase](#)
- class [Solver](#)

5.6.1 Detailed Description

Filters with [Elliptic](#) response characteristics

5.7 lir::Legendre Namespace Reference

Classes

- class [AnalogLowPass](#)
- struct [BandPass](#)
- struct [BandPassBase](#)
- struct [BandStop](#)
- struct [BandStopBase](#)
- struct [HighPass](#)
- struct [HighPassBase](#)
- struct [LowPass](#)
- struct [LowPassBase](#)
- class [PolynomialFinder](#)
- class [PolynomialFinderBase](#)
- struct [Workspace](#)
- struct [WorkspaceBase](#)

5.7.1 Detailed Description

Filters with [Legendre](#) / "Optimum-L" response characteristics

5.8 lir::RBJ Namespace Reference

Classes

- struct [AllPass](#)
- struct [BandPass1](#)
- struct [BandPass2](#)
- struct [BandShelf](#)
- struct [BandStop](#)
- struct [HighPass](#)
- struct [HighShelf](#)
- struct [IIRNotch](#)
- struct [LowPass](#)
- struct [LowShelf](#)
- struct [RBJbase](#)

The base class of all [RBJ](#) filters.

5.8.1 Detailed Description

Filter realizations based on Robert Bristol-Johnson formulae:

<http://www.musicdsp.org/files/Audio-EQ-Cookbook.txt>

These are all 2nd order filters which are tuned with the Q (or Quality factor). The Q factor causes a resonance at the cutoff frequency. The higher the Q factor the higher the resonance. If $0.5 < Q < 1/\sqrt{2}$ then there is no resonance peak. Above $1/\sqrt{2}$ the peak becomes more and more pronounced. For bandpass and stopband the Q factor is replaced by the width of the filter. The higher Q the more narrow the bandwidth of the notch or bandpass.

6 Class Documentation

6.1 Iir::RBJ::AllPass Struct Reference

Inheritance diagram for Iir::RBJ::AllPass:

Additional Inherited Members

The documentation for this struct was generated from the following files:

- iir/RBJ.h
- iir/RBJ.cpp

6.2 Iir::Butterworth::AnalogLowPass Class Reference

Inheritance diagram for Iir::Butterworth::AnalogLowPass:

The documentation for this class was generated from the following files:

- iir/Butterworth.h
- iir/Butterworth.cpp

6.3 Iir::ChebyshevI::AnalogLowPass Class Reference

Inheritance diagram for Iir::ChebyshevI::AnalogLowPass:

The documentation for this class was generated from the following files:

- iir/ChebyshevI.h
- iir/ChebyshevI.cpp

6.4 Iir::Elliptic::AnalogLowPass Class Reference

Inheritance diagram for Iir::Elliptic::AnalogLowPass:

The documentation for this class was generated from the following files:

- iir/Elliptic.h
- iir/Elliptic.cpp

6.5 Iir::Legendre::AnalogLowPass Class Reference

Inheritance diagram for Iir::Legendre::AnalogLowPass:

The documentation for this class was generated from the following files:

- iir/Legendre.h
- iir/Legendre.cpp

6.6 Iir::Bessel::AnalogLowPass Class Reference

Inheritance diagram for Iir::Bessel::AnalogLowPass:

The documentation for this class was generated from the following files:

- iir/Bessel.h
- iir/Bessel.cpp

6.7 Iir::ChebyshevII::AnalogLowPass Class Reference

Inheritance diagram for Iir::ChebyshevII::AnalogLowPass:

The documentation for this class was generated from the following files:

- iir/ChebyshevII.h
- iir/ChebyshevII.cpp

6.8 Iir::Bessel::AnalogLowShelf Class Reference

Inheritance diagram for Iir::Bessel::AnalogLowShelf:

The documentation for this class was generated from the following files:

- iir/Bessel.h
- iir/Bessel.cpp

6.9 Iir::Butterworth::AnalogLowShelf Class Reference

Inheritance diagram for Iir::Butterworth::AnalogLowShelf:

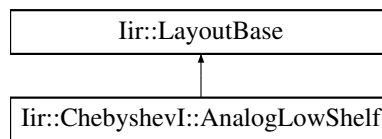

The documentation for this class was generated from the following files:

- iir/Butterworth.h
- iir/Butterworth.cpp

6.10 Iir::ChebyshevI::AnalogLowShelf Class Reference

Inheritance diagram for Iir::ChebyshevI::AnalogLowShelf:

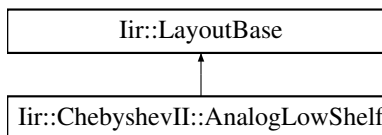

The documentation for this class was generated from the following files:

- iir/ChebyshevI.h
- iir/ChebyshevI.cpp

6.11 Iir::ChebyshevII::AnalogLowShelf Class Reference

Inheritance diagram for Iir::ChebyshevII::AnalogLowShelf:

The documentation for this class was generated from the following files:

- iir/ChebyshevII.h
- iir/ChebyshevII.cpp

6.12 Iir::RootFinderBase::Array Struct Reference

The documentation for this struct was generated from the following file:

- iir/RootFinder.h

6.13 Iir::ChebyshevII::BandPass< MaxOrder, StateType > Struct Template Reference

```
#include <ChebyshevII.h>
```

Inheritance diagram for Iir::ChebyshevII::BandPass< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double widthFrequency, double stopBandDb)

6.13.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::ChebyshevII::BandPass< MaxOrder, StateType >
```

[ChebyshevII](#) bandpass filter

6.13.2 Member Function Documentation

6.13.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::ChebyshevII::BandPass< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency,
    double stopBandDb ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Center frequency of the bandpass
<i>widthFrequency</i>	Width of the bandpass
<i>stopBandDb</i>	Permitted ripples in dB in the stopband

The documentation for this struct was generated from the following file:

- [iir/ChebyshevII.h](#)

6.14 Iir::Elliptic::BandPass< MaxOrder, StateType > Struct Template Reference

Inheritance diagram for Iir::Elliptic::BandPass< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double widthFrequency, double rippleDb, double rolloff)

6.14.1 Member Function Documentation

6.14.1.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::Elliptic::BandPass< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency,
    double rippleDb,
    double rolloff ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Centre frequency of the bandpass
<i>widthFrequency</i>	Frequency width of the bandpass
<i>rippleDb</i>	Permitted ripples in dB in the passband
<i>rolloff</i>	Rolloff from the pass- to stopband

The documentation for this struct was generated from the following file:

- iir/Elliptic.h

6.15 Iir::Legendre::BandPass< MaxOrder, StateType > Struct Template Reference

Inheritance diagram for Iir::Legendre::BandPass< MaxOrder, StateType >:

The documentation for this struct was generated from the following file:

- iir/Legendre.h

6.16 Iir::Bessel::BandPass< MaxOrder, StateType > Struct Template Reference

```
#include <Bessel.h>
```

Inheritance diagram for Iir::Bessel::BandPass< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double widthFrequency)

6.16.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::Bessel::BandPass< MaxOrder, StateType >
```

[Bessel](#) bandpass.

6.16.2 Member Function Documentation

6.16.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::Bessel::BandPass< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency ) [inline]
```

Calculate the coefficients

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Center frequency of the bandpass in Hz
<i>widthFrequency</i>	Width of the bandpass in Hz

The documentation for this struct was generated from the following file:

- iir/Bessel.h

6.17 `Iir::ChebyshevI::BandPass< MaxOrder, StateType >` Struct Template Reference

```
#include <ChebyshevI.h>
```

Inheritance diagram for `Iir::ChebyshevI::BandPass< MaxOrder, StateType >`:

Public Member Functions

- void [setup](#) (double *sampleRate*, double *centerFrequency*, double *widthFrequency*, double *rippleDb*)

6.17.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::ChebyshevI::BandPass< MaxOrder, StateType >
```

[ChebyshevI](#) bandpass filter

6.17.2 Member Function Documentation

6.17.2.1 `setup()`

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::ChebyshevI::BandPass< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency,
    double rippleDb ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Center frequency of the bandpass
<i>widthFrequency</i>	Frequency with of the passband
<i>rippleDb</i>	Permitted ripples in dB in the passband

The documentation for this struct was generated from the following file:

- `iir/ChebyshevI.h`

6.18 Iir::Butterworth::BandPass< MaxOrder, StateType > Struct Template Reference

```
#include <Butterworth.h>
```

Inheritance diagram for Iir::Butterworth::BandPass< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double widthFrequency)

6.18.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::Butterworth::BandPass< MaxOrder, StateType >
```

[Butterworth](#) Bandpass filter.

6.18.2 Member Function Documentation

6.18.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::Butterworth::BandPass< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency ) [inline]
```

Calculates the coefficients

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Centre frequency of the bandpass
<i>widthFrequency</i>	Width of the bandpass

The documentation for this struct was generated from the following file:

- iir/Butterworth.h

6.19 Iir::RBJ::BandPass1 Struct Reference

```
#include <RBJ.h>
```

Inheritance diagram for Iir::RBJ::BandPass1:

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double bandWidth)

6.19.1 Detailed Description

Bandpass with constant skirt gain

6.19.2 Member Function Documentation

6.19.2.1 setup()

```
void Iir::RBJ::BandPass1::setup (
    double sampleRate,
    double centerFrequency,
    double bandWidth )
```

Calculates the coefficients

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Center frequency of the bandpass
<i>bandWidth</i>	Bandwidth of the bandpass

The documentation for this struct was generated from the following files:

- iir/RBJ.h
- iir/RBJ.cpp

6.20 Iir::RBJ::BandPass2 Struct Reference

```
#include <RBJ.h>
```

Inheritance diagram for Iir::RBJ::BandPass2:

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double bandWidth)

6.20.1 Detailed Description

Bandpass with constant 0 dB peak gain

6.20.2 Member Function Documentation

6.20.2.1 setup()

```
void Iir::RBJ::BandPass2::setup (
    double sampleRate,
    double centerFrequency,
    double bandWidth )
```

Calculates the coefficients

Parameters

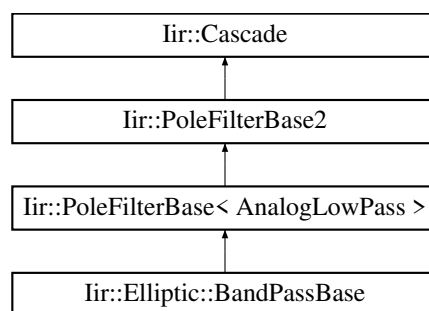

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Center frequency of the bandpass
<i>bandWidth</i>	Bandwidth of the bandpass

The documentation for this struct was generated from the following files:

- iir/RBJ.h
- iir/RBJ.cpp

6.21 Iir::Elliptic::BandPassBase Struct Reference

Inheritance diagram for Iir::Elliptic::BandPassBase:

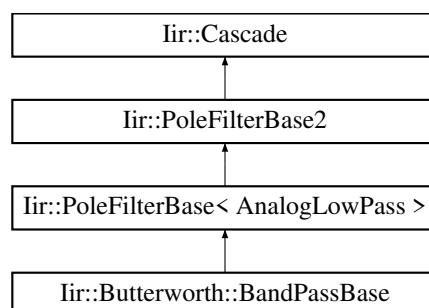

The documentation for this struct was generated from the following files:

- iir/Elliptic.h
- iir/Elliptic.cpp

6.22 Iir::Butterworth::BandPassBase Struct Reference

Inheritance diagram for Iir::Butterworth::BandPassBase:

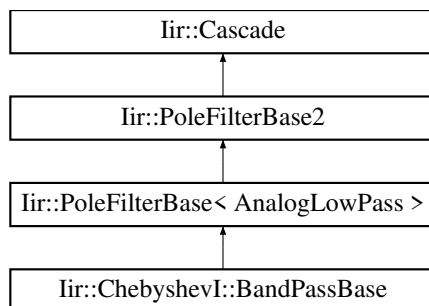

The documentation for this struct was generated from the following files:

- iir/Butterworth.h
- iir/Butterworth.cpp

6.23 Iir::ChebyshevI::BandPassBase Struct Reference

Inheritance diagram for Iir::ChebyshevI::BandPassBase:

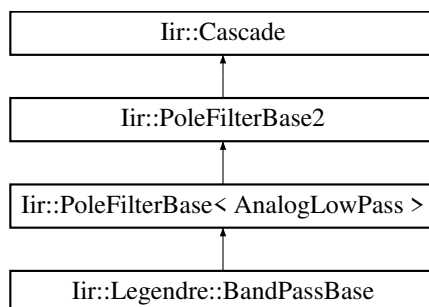

The documentation for this struct was generated from the following files:

- iir/ChebyshevI.h
- iir/ChebyshevI.cpp

6.24 Iir::Legendre::BandPassBase Struct Reference

Inheritance diagram for Iir::Legendre::BandPassBase:

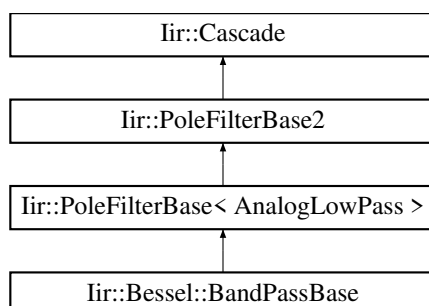

The documentation for this struct was generated from the following files:

- iir/Legendre.h
- iir/Legendre.cpp

6.25 Iir::Bessel::BandPassBase Struct Reference

Inheritance diagram for Iir::Bessel::BandPassBase:

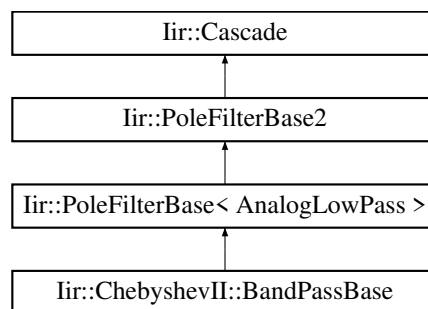

The documentation for this struct was generated from the following files:

- iir/Bessel.h
- iir/Bessel.cpp

6.26 Iir::ChebyshevII::BandPassBase Struct Reference

Inheritance diagram for Iir::ChebyshevII::BandPassBase:

The documentation for this struct was generated from the following files:

- iir/ChebyshevII.h
- iir/ChebyshevII.cpp

6.27 Iir::BandPassTransform Class Reference

```
#include <PoleFilter.h>
```

6.27.1 Detailed Description

low pass to band pass transform

The documentation for this class was generated from the following files:

- iir/PoleFilter.h
- iir/PoleFilter.cpp

6.28 Iir::Butterworth::BandShelf< MaxOrder, StateType > Struct Template Reference

```
#include <Butterworth.h>
```

Inheritance diagram for Iir::Butterworth::BandShelf< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double widthFrequency, double gainDb)

6.28.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::Butterworth::BandShelf< MaxOrder, StateType >
```

Butterworth Bandshef filter: it is a bandpass filter which amplifies at a specified gain in dB the frequencies in the passband.

6.28.2 Member Function Documentation

6.28.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::Butterworth::BandShelf< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency,
    double gainDb ) [inline]
```

Calculates the coefficients

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Centre frequency of the passband
<i>widthFrequency</i>	Width of the passband
<i>gainDb</i>	The gain in the passband

The documentation for this struct was generated from the following file:

- iir/Butterworth.h

6.29 Iir::ChebyshevII::BandShelf< MaxOrder, StateType > Struct Template Reference

```
#include <ChebyshevII.h>
```

Inheritance diagram for Iir::ChebyshevII::BandShelf< MaxOrder, StateType >:

Public Member Functions

- void **setup** (double sampleRate, double centerFrequency, double widthFrequency, double gainDb, double stopBandDb)

6.29.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::ChebyshevI::BandShelf< MaxOrder, StateType >
```

[ChebyshevI](#) bandshelf filter. Bandpass with specified gain and 0 dB gain in the stopband.

6.29.2 Member Function Documentation

6.29.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::ChebyshevII::BandShelf< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency,
    double gainDb,
    double stopBandDb ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Center frequency of the bandpass
<i>widthFrequency</i>	Width of the bandpass
<i>gainDb</i>	Gain in the passband. The stopband has always 0dB.
<i>stopBandDb</i>	Permitted ripples in dB in the stopband

The documentation for this struct was generated from the following file:

- iir/ChebyshevII.h

6.30 Iir::ChebyshevI::BandShelf< MaxOrder, StateType > Struct Template Reference

```
#include <ChebyshevI.h>
```

Inheritance diagram for Iir::ChebyshevI::BandShelf< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double widthFrequency, double gainDb, double rippleDb)

6.30.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::ChebyshevI::BandShelf< MaxOrder, StateType >
```

[ChebyshevI](#) bandshelf filter. Specified gain in the passband. Otherwise 0 dB.

6.30.2 Member Function Documentation

6.30.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::ChebyshevI::BandShelf< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency,
    double gainDb,
    double rippleDb ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Center frequency of the passband
<i>widthFrequency</i>	Width of the passband.
<i>gainDb</i>	Gain in the passband. The stopband has 0 dB.
<i>rippleDb</i>	Permitted ripples in dB in the passband.

The documentation for this struct was generated from the following file:

- iir/ChebyshevI.h

6.31 Iir::RBJ::BandShelf Struct Reference

Inheritance diagram for Iir::RBJ::BandShelf:

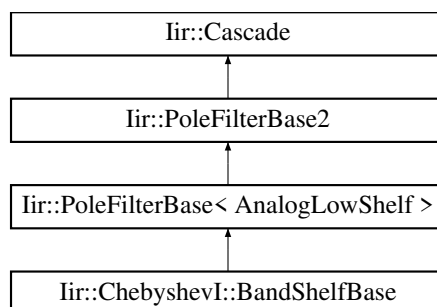

Additional Inherited Members

The documentation for this struct was generated from the following files:

- iir/RBJ.h
- iir/RBJ.cpp

6.32 Iir::ChebyshevI::BandShelfBase Struct Reference

Inheritance diagram for Iir::ChebyshevI::BandShelfBase:

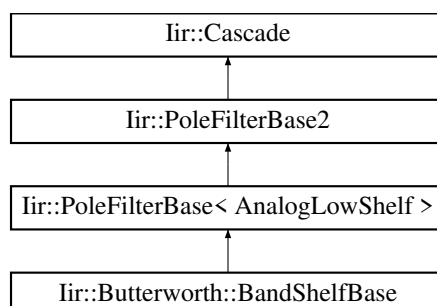

The documentation for this struct was generated from the following files:

- iir/ChebyshevI.h
- iir/ChebyshevI.cpp

6.33 Iir::Butterworth::BandShelfBase Struct Reference

Inheritance diagram for Iir::Butterworth::BandShelfBase:

The documentation for this struct was generated from the following files:

- iir/Butterworth.h
- iir/Butterworth.cpp

6.34 Iir::ChebyshevII::BandShelfBase Struct Reference

Inheritance diagram for Iir::ChebyshevII::BandShelfBase:

The documentation for this struct was generated from the following files:

- iir/ChebyshevII.h
- iir/ChebyshevII.cpp

6.35 Iir::ChebyshevII::BandStop< MaxOrder, StateType > Struct Template Reference

```
#include <ChebyshevII.h>
```

Inheritance diagram for Iir::ChebyshevII::BandStop< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double widthFrequency, double stopBandDb)

6.35.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::ChebyshevII::BandStop< MaxOrder, StateType >
```

[ChebyshevII](#) bandstop filter.

6.35.2 Member Function Documentation

6.35.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::ChebyshevII::BandStop< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency,
    double stopBandDb ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Center frequency of the bandstop
<i>widthFrequency</i>	Width of the bandstop
<i>stopBandDb</i>	Permitted ripples in dB in the stopband

The documentation for this struct was generated from the following file:

- iir/ChebyshevII.h

6.36 Iir::Elliptic::BandStop< MaxOrder, StateType > Struct Template Reference

Inheritance diagram for Iir::Elliptic::BandStop< MaxOrder, StateType >:

Public Member Functions

- void `setup` (double `sampleRate`, double `centerFrequency`, double `widthFrequency`, double `rippleDb`, double `rolloff`)

6.36.1 Member Function Documentation

6.36.1.1 setup()

```

template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::Elliptic::BandStop< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency,
    double rippleDb,
    double rolloff ) [inline]
  
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Centre frequency of the bandstop
<i>widthFrequency</i>	Frequency width of the bandstop
<i>rippleDb</i>	Permitted ripples in dB in the passband
<i>rolloff</i>	Rolloff from the pass- to stopband

The documentation for this struct was generated from the following file:

- `iir/Elliptic.h`

6.37 `Iir::Legendre::BandStop< MaxOrder, StateType >` Struct Template Reference

Inheritance diagram for `Iir::Legendre::BandStop< MaxOrder, StateType >`:

The documentation for this struct was generated from the following file:

- `iir/Legendre.h`

6.38 `Iir::ChebyshevI::BandStop< MaxOrder, StateType >` Struct Template Reference

```
#include <ChebyshevI.h>
```

Inheritance diagram for `Iir::ChebyshevI::BandStop< MaxOrder, StateType >`:

Public Member Functions

- `void setup` (double `sampleRate`, double `centerFrequency`, double `widthFrequency`, double `rippleDb`)

6.38.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::ChebyshevI::BandStop< MaxOrder, StateType >
```

[ChebyshevI](#) bandstop filter

6.38.2 Member Function Documentation

6.38.2.1 `setup()`

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::ChebyshevI::BandStop< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency,
    double rippleDb ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Center frequency of the notch
<i>widthFrequency</i>	Frequency with of the notch
<i>rippleDb</i>	Permitted ripples in dB in the passband

The documentation for this struct was generated from the following file:

- iir/ChebyshevI.h

6.39 Iir::Bessel::BandStop< MaxOrder, StateType > Struct Template Reference

```
#include <Bessel.h>
```

Inheritance diagram for Iir::Bessel::BandStop< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double widthFrequency)

6.39.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::Bessel::BandStop< MaxOrder, StateType >
```

[Bessel](#) bandstop.

6.39.2 Member Function Documentation

6.39.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::Bessel::BandStop< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency ) [inline]
```

Calculate the coefficients

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Center frequency of the bandpass in Hz
<i>widthFrequency</i>	Width of the bandpass in Hz

The documentation for this struct was generated from the following file:

- iir/Bessel.h

6.40 Iir::RBJ::BandStop Struct Reference

```
#include <RBJ.h>
```

Inheritance diagram for Iir::RBJ::BandStop:

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double bandWidth)

6.40.1 Detailed Description

Bandstop filter. Warning: the bandwidth might not be accurate for narrow notches.

6.40.2 Member Function Documentation

6.40.2.1 setup()

```
void Iir::RBJ::BandStop::setup (
    double sampleRate,
    double centerFrequency,
    double bandWidth )
```

Calculates the coefficients

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Center frequency of the bandstop
<i>bandWidth</i>	Bandwidth of the bandstop

The documentation for this struct was generated from the following files:

- iir/RBJ.h
- iir/RBJ.cpp

6.41 Iir::Butterworth::BandStop< MaxOrder, StateType > Struct Template Reference

```
#include <Butterworth.h>
```

Inheritance diagram for Iir::Butterworth::BandStop< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double widthFrequency)

6.41.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::Butterworth::BandStop< MaxOrder, StateType >
```

[Butterworth](#) Bandstop filter.

6.41.2 Member Function Documentation

6.41.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::Butterworth::BandStop< MaxOrder, StateType >::setup (
    double sampleRate,
    double centerFrequency,
    double widthFrequency ) [inline]
```

Calculates the coefficients

Parameters

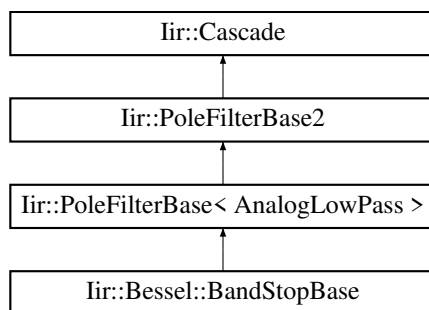

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Centre frequency of the bandstop
<i>widthFrequency</i>	Width of the bandstop

The documentation for this struct was generated from the following file:

- iir/Butterworth.h

6.42 Iir::Bessel::BandStopBase Struct Reference

Inheritance diagram for Iir::Bessel::BandStopBase:

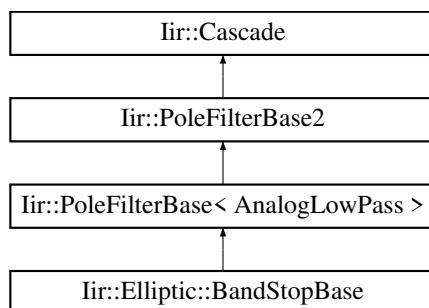

The documentation for this struct was generated from the following files:

- iir/Bessel.h

```

Inheritance diagram for Iir::ChebyshevII::HighPass< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double cutoffFrequency, double stopBandDb)

6.58.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::ChebyshevII::HighPass< MaxOrder, StateType >
```

[ChebyshevII](#) highpass filter

6.58.2 Member Function Documentation

6.58.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::ChebyshevII::HighPass< MaxOrder, StateType >::setup (
    double sampleRate,
    double cutoffFrequency,
    double stopBandDb ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>cutoffFrequency</i>	Cutoff frequency.
<i>stopBandDb</i>	Permitted ripples in dB in the stopband

The documentation for this struct was generated from the following file:

- [iir/ChebyshevII.h](#)

6.59 Iir::Elliptic::HighPass< MaxOrder, StateType > Struct Template Reference

Inheritance diagram for Iir::Elliptic::HighPass< MaxOrder, StateType >:

Public Member Functions

template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::ChebyshevI::HighPass< MaxOrder, StateType >
```

[ChebyshevI](#) highpass filter

6.62.2 Member Function Documentation

6.62.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::ChebyshevI::HighPass< MaxOrder, StateType >::setup (
    double sampleRate,
    double cutoffFrequency,
    double rippleDb ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>cutoffFrequency</i>	Cutoff frequency.
<i>rippleDb</i>	Permitted ripples in dB in the passband

The documentation for this struct was generated from the following file:

- `iir/ChebyshevI.h`

6.63 Iir::RBJ::HighPass Struct Reference

```
#include <RBJ.h>
```

Inheritance diagram for Iir::RBJ::HighPass:

Public Member Functions

- void [setup](#) (double sampleRate, double cutoffFrequency, double q)

6.63.1 Detailed Description

Highpass.

6.63.2 Member Function Documentation

6.63.2.1 setup()

```
void Iir::RBJ::HighPass::setup (
    double sampleRate,
    double cutoffFrequency,
    double q )
```

Calculates the coefficients

Parameters

<i>sampleRate</i>	Sampling rate
<i>cutoffFrequency</i>	Cutoff frequency
<i>q</i>	Q factor determines the resonance peak at the cutoff.

The documentation for this struct was generated from the following files:

- iir/RBJ.h
- iir/RBJ.cpp

Public Member Functions

- void [setup](#) (double sampleRate, double cutoffFrequency, double gainDb)

6.72.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::Butterworth::HighShelf< MaxOrder, StateType >
```

[Butterworth](#) high shelf filter. Above the cutoff the filter has a specified gain and below it has 0 dB.

6.72.2 Member Function Documentation

6.72.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::Butterworth::HighShelf< MaxOrder, StateType >::setup (
    double sampleRate,
    double cutoffFrequency,
    double gainDb ) [inline]
```

Calculates the coefficients

Parameters

<i>sampleRate</i>	Sampling rate
<i>cutoffFrequency</i>	Cutoff
<i>gainDb</i>	Gain in dB of the filter in the passband

The documentation for this struct was generated from the following file:

- iir/Butterworth.h

6.73 Iir::ChebyshevII::HighShelf< MaxOrder, StateType > Struct Template Reference

```
#include <ChebyshevII.h>

Inheritance diagram for Iir::ChebyshevII::HighShelf< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double cutoffFrequency, double gainDb, double stopBandDb)

6.73.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::ChebyshevII::HighShelf< MaxOrder, StateType >
```

[ChebyshevII](#) high shelf filter. Specified gain in the passband and 0dB in the stopband.

6.73.2 Member Function Documentation

6.73.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::ChebyshevII::HighShelf< MaxOrder, StateType >::setup (
    double sampleRate,
    double cutoffFrequency,
    double gainDb,
    double stopBandDb ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>cutoffFrequency</i>	Cutoff frequency.
<i>gainDb</i>	Gain the passband. The stopband has 0 dB gain.
<i>stopBandDb</i>	Permitted ripples in dB in the stopband

The documentation for this struct was generated from the following file:

- iir/ChebyshevII.h

6.74 Iir::ChebyshevI::HighShelf< MaxOrder, StateType > Struct Template Reference

6.74.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::ChebyshevI::HighShelf< MaxOrder, StateType >
```

[ChebyshevI](#) high shelf filter. Specified gain in the passband. Otherwise 0 dB.

6.74.2 Member Function Documentation

6.74.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::ChebyshevI::HighShelf< MaxOrder, StateType >::setup (
    double sampleRate,
    double cutoffFrequency,
    double gainDb,
    double rippleDb ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>cutoffFrequency</i>	Cutoff frequency.
<i>gainDb</i>	Gain in the passband
<i>rippleDb</i>	Permitted ripples in dB in the passband

Public Member Functions

- void [setup](#) (double sampleRate, double centerFrequency, double q_factor)

6.79.1 Detailed Description

Bandstop with Q factor: the higher the Q factor the more narrow is the notch. The goal is to have an as narrow as possible notch. However, a narrow notch has a long impulse response (= ringing) and numerical problems might prevent perfect damping. Practical values of the Q factor are about $Q = 10$. In terms of the design the Q factor defines the radius of the pole as $r = \exp(-\pi * (\text{centerFrequency}/\text{sampleRate})/q_factor)$ whereas the angle of the pole/zero defines the bandstop frequency. The higher Q is the closer r moves towards the unit circle. This is equivalent of an analogue Q factor.

6.79.2 Member Function Documentation

6.79.2.1 setup()

```
void Iir::RBJ::IIRNotch::setup (
    double sampleRate,
    double centerFrequency,
    double q_factor )
```

Calculates the coefficients

Parameters

<i>sampleRate</i>	Sampling rate
<i>centerFrequency</i>	Center frequency of the notch
<i>q_factor</i>	Q factor of the notch (1 to ~20)

The documentation for this struct was generated from the following files:

- iir/RBJ.h

Public Member Functions

- void [setup](#) (double sampleRate, double cutoffFrequency, double stopBandDb)

6.82.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::ChebyshevII::LowPass< MaxOrder, StateType >
```

[ChebyshevII](#) lowpass filter

6.82.2 Member Function Documentation

6.82.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::ChebyshevII::LowPass< MaxOrder, StateType >::setup (
    double sampleRate,
    double cutoffFrequency,
    double stopBandDb ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>cutoffFrequency</i>	Cutoff frequency.
<i>stopBandDb</i>	Permitted ripples in dB in the stopband

The documentation for this struct was generated from the following file:

- [iir/ChebyshevII.h](#)

6.83 Iir::Elliptic::LowPass< MaxOrder, StateType > Struct Template Reference

Inheritance diagram for Iir::Elliptic::LowPass< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double cutoffFrequency, double rippleDb, double rolloff)

6.83.1 Member Function Documentation

6.83.1.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::Elliptic::LowPass< MaxOrder, StateType >::setup (
    double sampleRate,
    double cutoffFrequency,
    double rippleDb,
    double rolloff ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>cutoffFrequency</i>	Cutoff frequency.
<i>rippleDb</i>	Permitted ripples in dB in the passband
<i>rolloff</i>	Rolloff from the pass- to stopband

The documentation for this struct was generated from the following file:

6.95 Iir::LowPassTransform Class Reference

```
#include <PoleFilter.h>
```

6.95.1 Detailed Description

s-plane to z-plane transforms

For pole filters, an analog prototype is created via placement of poles and zeros in the s-plane. The analog prototype is either a halfband low pass or a halfband low shelf. The poles, zeros, and normalization parameters are transformed into the z-plane using variants of the bilinear transformation. low pass to low pass

The documentation for this class was generated from the following files:

- iir/PoleFilter.h
- iir/PoleFilter.cpp

6.96 Iir::ChebyshevII::LowShelf< MaxOrder, StateType > Struct Template Reference

```

Inheritance diagram for Iir::ChebyshevII::LowShelf< MaxOrder, StateType >:

Public Member Functions

- void [setup](#) (double sampleRate, double cutoffFrequency, double gainDb, double stopBandDb)

6.96.1 Detailed Description

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
struct Iir::ChebyshevII::LowShelf< MaxOrder, StateType >
```

[ChebyshevII](#) low shelf filter. Specified gain in the passband and 0dB in the stopband.

6.96.2 Member Function Documentation

6.96.2.1 setup()

```
template<int MaxOrder, class StateType = DEFAULT_STATE>
void Iir::ChebyshevII::LowShelf< MaxOrder, StateType >::setup (
    double sampleRate,
    double cutoffFrequency,
    double gainDb,
    double stopBandDb ) [inline]
```

Calculates the coefficients of the filter

Parameters

<i>sampleRate</i>	Sampling rate
<i>cutoffFrequency</i>	Cutoff frequency.
<i>gainDb</i>	Gain the passband. The stopband has 0 dB gain.
<i>stopBandDb</i>	Permitted ripples in dB in the stopband

The documentation for this struct was generated from the following file:
